STUDY AND CONCEPTUAL DESIGN**

**R.F.P. NO. 2022-PD-19**

**TOWN OF FORT FRANCES**

**ADDENDUM # 1**

The Corporation of the Town of Fort Frances hereby amends the Request for Proposal 2022-PD-19 for a LA VERENDRYE PARKWAY EXPANSION – FEASIBILITY STUDY AND CONCEPTUAL DESIGN in accordance with the Request for Proposal and the Procurement Policy 1.12. This Addendum hereby forms part of the RFP 2022-PD-19.

The Purpose of this Addendum is to provide responses to questions received:

<b>Question 1</b>	<b>The level of investigation expected in regard to “engineering concepts” is unclear, what level of investigation is expected?</b>
Answer 1	<p>The Town expects that proponents will allocate resources to retain and receive recommendations on the project from the following professionals as determined necessary by the proponent which may include but not be limited to environmental scientist(s), municipal engineer(s), structural engineer(s), geotechnical engineer(s), hydrotechnical engineer(s) and civil engineer(s). The Town does not expect that construction contract engineering design work will take place, however, that these professionals will provide advice, guidance and recommendations that will be used to provide construction and final alignment recommendations, advise on necessary permitting and regulatory approval for construction, assist in developing cross-section concepts and to assist with engineering cost estimates and the final report.</p> <p>It is also expected that the professionals will review, in-person, existing site conditions to assist with their recommendations.</p> <p>It is further reiterated that the Town does not expect the implementation of geotechnical drilling program in this project, though that the cost of such investigation will be included in the Engineering Cost Estimate.</p>
